

Kindly join us for Talk on “Multicolour Panel Design Tools” by Dr John Wotherspoon, Regional Marketing Director, Asia Pacific, BD Biosciences on 26th June, 2: 30 pm onwards at ATPC Seminar Hall. (Adjacent to RCB building)

The Talk will focus on a smart approach to panel design to help unlock the full potential of your research offered by innovations in flow cytometry systems and will cover the following topics :

REVEAL:

Implications of relative fluorochrome brightness in resolving your population of interest.

ELEVATE: The importance of Antigen Density in choosing antibody/fluorochrome combinations.

RESOLVE:

Managing instrument set up to address spectral overlap and maximize resolution.

ACHIEVE: Putting it all together - building optimal panels from 4 to 11 colours.

Program has been jointly organised by Translational Health Science and Technology Institute (THSTI) & Regional Center for Biotechnology (RCB)
